## Important Rate Information for Residential Natural Gas Customers

The rate you pay for your natural gas rates will change effective with usage on and after November 1, 2007. The Gas Cost Rate (GCR) component used in the calculation of your bill is decreasing due to lower gas commodity costs. The overall effect of these changes will vary, based on your usage:

- Effective November 1, 2007, residential customers that use roughly 120 ccf of natural gas per month during the heating season will see an overall bill decrease of approximately 4.0 percent or \$7.01 per month, from \$177.38 to \$170.37.

**Rate Changes to Delaware Residential Customer Bills**

Effective June 1, 2007, Delmarva Power's supply rates have changed based on a schedule approved by the Delaware Public Service Commission (DEPSC). The new rates will increase the typical residential customer's bill by about 1% or \$1.83 a month. Delmarva Power used a competitive bidding process under the regulatory oversight of the DE PSC to purchase power on behalf of it's Delaware customers and the supply prices have been reset based on the lowest bids.

For more information, visit [www.delmarva.com](http://www.delmarva.com) and click on the "Choices and Rates" tab.

\* Phase-In Credit - Customers who have an Electric Delivery Phase-In Summary section on their bill elected to have their rates phased-in over time, without interest. The Phase-In Credit/Charge line item in the Electric Supply Section only applies to those customers. Between June 1, 2007 and December 31, 2007, you may have a credit or no charge at all depending on your tariff and the season. Please note that as of January 1, 2008, you will begin to pay back the amount you deferred and the line item will become a phase-in "charge."
